

INNOVATE

AI/ML EDITION

Strategies to accelerate AIML at scale

Chris Howard FBCS CITP
Head of AI/ML Solutions Architecture, APJ
Amazon Web Services

Agenda

- Session overview
- Reality check
- Why now ?
- 6 Key drivers of success
- Resources to start your journey

Machine learning is ~~the future~~
happening now

AI and Machine Learning

AI's Promise

The allure and promise of Artificial Intelligence / Machine Learning is compelling

Barriers to Entry

Technology providers are democratising machine learning and lowering the initial technical and skills barriers to entry

Proof of Concepts

Machine Learning experiments and PoC's are getting easier, faster and cheaper to execute

Machine learning is transformative*

*causing or able to cause an important and lasting change in someone or something

1 Get your
data in
order

Understanding your data strategy

What data is available today?

What data can be made **easily available**?

In one year, what data will we wish we had started collecting today?

2 Understanding where to apply ML

Picking your first use case: balance speed with value

1 Can you achieve success in the 6-10 months?

2 Does it solve a real problem for the business?

3 Are there places where you already have a lot of untapped data?

4 Does it need machine learning?

Where to apply ML

DATA READINESS

Low ←————→ High

BUSINESS IMPACT

Low ←————→ **High**

ML APPLICABILITY (Chance of success based on state of the art and team skills)

[illegible]

Where to apply ML

DATA READINESS

BUSINESS IMPACT

ML APPLICABILITY (Chance of success based on state of the art and team skills)

Frustrated data scientists

Where to apply ML

DATA READINESS

BUSINESS IMPACT

ML APPLICABILITY (Chance of success based on state of the art and team skills)

Good prototype to build experience

3

Developing
your team

1. Data Analysts and Scientists
 2. AI and Machine Learning Specialists
 3. Big Data Specialists
-

Top 20 job roles in increasing demand across industries

—World Economic Forum, 2020

http://www3.weforum.org/docs/WEF_Future_of_Jobs_2020.pdf

Develop your team – Technical experts

- Build your team
- Broadly enable all developers to use ML
- Training, training, training

Domain experts

Technical experts

4 Championing a Culture of AI

Crossing the culture chasm

People, Process and Technology

Only **8%** of firms engage in core practices that support widespread adoption of AI.
— HBR, Building the AI-Powered Organization

<https://hbr.org/2019/07/building-the-ai-powered-organization>

Executive sponsorship

How will you use machine learning?

“We won’t” is not an acceptable answer

Setting expectations

- Set big, top-down goals
- Be tolerant of failure
- Take a long-term view
- Celebrate success

5 Remove undifferentiated heavy lifting

Why AWS for ML?

BROADEST AND DEEPEST SET OF AI AND ML SERVICES

250 new features and services launched this last year for everyone from ML scientists to application developers

ACCELERATE YOUR ADOPTION OF ML

Amazon SageMaker creates efficiencies and lowers costs
Acceleration programs and trainings

BUILT ON THE MOST COMPREHENSIVE CLOUD PLATFORM

The strongest set of compute, storage, security, database, and analytics capabilities to build upon

<https://aws.amazon.com/what-is-aws/>
<https://aws.amazon.com/machine-learning/>

6 Architect for tomorrow, build for today

Taking applications to production

Write

Write source code for your software

Build

Build / compile the software

Test

Test to make sure it works as expected

Deploy

Deploy the software to servers

Use

Use the software in production

Taking Machine Learning models to production

**Data
ingestion**

**Data
preparation**

**Feature
engineering**

**Model
training**

**Model
monitoring /
re-training**

Inference

**Model
deployment**

**Model
evaluation &
tuning**

AWS Well-Architected Framework

Operational
excellence

Security

Reliability

Performance
efficiency

Cost
optimization

<https://aws.amazon.com/architecture/well-architected>

ML Lens - AWS Well-Architected Framework

Well-Architected pillar	Key Best Practices for ML
Cost Optimization	Use managed services to reduce cost
Operational Excellence	Version ML inputs and artifacts Automate machine learning deployment pipelines
Reliability	Train once and deploy across environments
Security	Restrict access to ML services
Performance Efficiency	Continuously monitor and measure system performance

<https://docs.aws.amazon.com/wellarchitected/latest/machine-learning-lens/welcome.html>

Get your journey of to a great start

1

Get your data in order

2

Understanding where to apply ML

3

Developing your team

4

Championing a Culture of AI

5

Remove undifferentiated heavy lifting

6

Architect for tomorrow, build for today

Visit the AI and Machine Learning Resource Hub for more resources

Dive deeper with these resources, get inspired and learn how you can use machine learning to accelerate business outcomes.

- The machine learning journey e-book
- Machine learning enterprise guide
- 7 leading machine learning use cases e-book
- A strategic playbook for data, analytics, and machine learning
- Accelerating ML innovation through security e-book
- ... and more!

AWS Machine Learning (ML) Training and Certification

Learn like an Amazonian, based on the curriculum we've used to train our own developers and data scientists

AWS is how you build machine learning skills

Courses built on the curriculum leveraged by Amazon's own teams. Learn from the experts at AWS.

Flexibility to learn your way

Learn online with 65+ on-demand digital courses or live with virtual instructor-led training, plus hands-on labs and opportunities for practical application.

Validate your expertise

Demonstrate expertise in building, training, tuning, and deploying machine learning models with an industry-recognized credential.

Thank You for Attending AWS Innovate

We hope you found it interesting! A kind reminder to **complete the survey**.
Let us know what you thought of today's event and how we can improve
the event experience for you in the future.
